

Amendment to Specification

Please amend page 5, line 21 though line 26 as follows:

The coronavirus used to prepare the inactivated virus vaccines of this invention is the Mebus strain having ATCC Accession No. VR-874. The bovine rotavirus used in the preparation of these vaccines includes three distinct rotavirus strains, including Cody 81-4 having ATCC accession number PTA-5955, G type 10B223 having ATCC accession number PTA-5956 and B641 having ATCC accession number PTA-5957 (all three strains are deposited according to the Budapest Treaty with the American Type Culture Collection, 10801 University Blvd., Manassas, VA, 20110-2209); the former two available from and being maintained at the Animal Disease Research and Diagnostic Laboratory, Brookings, South Dakota by David Benfield, the remaining strain being maintained at Texas A & M by Dr. Gerald Woode,
